Work Experience

Rundeck

Support Engineer
Jun 2021 to present

Rundeck is a tool that helps to define build, deploy and manage automation. It provides web console, CLI tools, and a Web API. It is written in Java and allows you to run tasks across a set of nodes. Have a lot of functionalities, and can be integrated with any OS, DB, and many app.

My principal tasks are:

- * Support users to setup Rundeck, with all the environments of the customers
- * Support users to resolve issues in Rundeck.
- * Support users to Resolve issues with scripting bash.
- * Support users to Manage any infrastructure, on premises and in the cloud
- * Integrations with tools and technologies to standardize the way that the customer manage diverse technology stack

I work over **technologies** like: OS: Windows Server, Linux (Ubuntu, Ubuntu server, Centos, RHEL). DB: Oracle, MySQL, MariaDB, Postgres, MS SQL. VM: VirtualBox, Vagrant, Docker. Cloud: AWS, Google Cloud. Code: Python, Scripting Bash. Connectivity: SSH, RDP. And more...
